## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-7 and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Stipek (US 2004/0032156 A1). Stipek discloses, in Figure 11F a tubular leg including a front side, a rear side, a laterally outer side, and a laterally inner side, the front and rear sides defining a depth of the leg, the laterally outer and laterally inner sides defining a width of the leg, the width being larger than the depth, one of the front side and the rear side being formed to include a bight (1102f) extending longitudinally along the leg to strengthen the leg, the front, rear, laterally outer and laterally inner sides cooperating to define an open interior region there between without any web portion lying therein and interconnecting two or more of said sides.

With respect to claim 7, the laterally inner and laterally outer sides are semi-circular, as seen above, and the rear side is straight in cross section and extends from the laterally inner side to the laterally outer side, the front side extends from the laterally inner side to the laterally outer side and is formed to include the bight (1102f).

With respect to claim 11, the front side is formed to include a bight (1102f).

With respect to claim 12, the rear side is formed to include a bight (1103f).

With respect to claim 13, the bight (1102f) is u-shaped in that it has two generally parallel sides and a bottom running perpendicular to those sides.

### ***Allowable Subject Matter***

3. Claims 1-5, 8-10, 21-25 allowed.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3636

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
